DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 9-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al. (U. S. Patent No. 6,233,426).

Regarding claim 1, Lee discloses an original pressing apparatus comprising: an original pressing plate;

a hinge unit having a first end supported rotatably with respect to said original pressing plate and a second end rotatably supported by an external device (fig. 7, link 84); and a press-fixing unit adapted to prevent rotation between said hinge unit and said original pressing plate by pressing said original pressing plate and said hinge unit into contact in a rotation axial direction, wherein said press-fixing unit is capable of releasing a press-contact state (figs. 7, 8A & B and 9A & B, col. 5, line 59 through col. 6 line 27).

Regarding claim 9, Lee discloses the original pressing apparatus according to claim 1, wherein said original pressing plate has a limitation member to limit rotation with respect to said hinge member (col. 5, line 66 through col. 6, line 3).

Art Unit: 26227

Regarding claim 10, arguments analogous to those presented for claim 9 are applicable to claim 10.

Regarding claims 11-14, Lee discloses that his cover assembly of scanning apparatus could also be applied to other devices in an image processing system (col. 3, lines 12-17).

Allowable Subject Matter

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
